

WebFOCUS

Release 8205.16
About This Release

January 02, 2020

Active Technologies, EDA, EDA/SQL, FIDEL, FOCUS, Information Builders, the Information Builders logo, iWay, iWay Software, Parlay, PC/FOCUS, RStat, Table Talk, Web390, WebFOCUS, WebFOCUS Active Technologies, and WebFOCUS Magnify are registered trademarks, and DataMigrator and Hyperstage are trademarks of Information Builders, Inc.

Adobe, the Adobe logo, Acrobat, Adobe Reader, Flash, Adobe Flash Builder, Flex, and PostScript are either registered trademarks or trademarks of Adobe Systems Incorporated in the United States and/or other countries.

Due to the nature of this material, this document refers to numerous hardware and software products by their trademarks. In most, if not all cases, these designations are claimed as trademarks or registered trademarks by their respective companies. It is not this publisher's intent to use any of these names generically. The reader is therefore cautioned to investigate all claimed trademark rights before using any of these names other than to refer to the product described.

Copyright © 2019, by Information Builders, Inc. and iWay Software. All rights reserved. Patent Pending. This manual, or parts thereof, may not be reproduced in any form without the written permission of Information Builders, Inc.

About WebFOCUS Release 8205.17

The following topic provides all the information that you need to know about this release of WebFOCUS.

In this chapter:

- ❑ [New Features in 8205.17](#)
 - ❑ [Known Issues for 8205.17](#)
 - ❑ [Fixes in 8205.17](#)
 - ❑ [Upgrade Considerations for 8205.17](#)
 - ❑ [System Requirements](#)
 - ❑ [Release and Gen Information for 8205.17](#)
-

New Features in 8205.17

There were no new features included in this release.

See all [8205 new features](#).

Known Issues for 8205.17

- ❑ Running the configuration migration from the CMD line or UNIX Shell displays an error message in the log file. This error does not impact migration of the configuration files.
- ❑ The Export Scenario dialog box does not display Master File Shortcuts in the list of available items under the Resources node. Even though they are not visible, Master File Shortcuts are present in the list and can be included in Export Scenarios. In order to add a Master File Shortcut to a scenario you must right-click the folder that contains it and choose the *Select with Sub-tree* menu option. The Master File Shortcut will be transferred to the Scenario, along with the rest of the items in the folder.

See all [8205 known issues](#).

Fixes in 8205.17

- ❑ When you have multiple multi-drill reports laid out side by side on an HTMLFORM, if you drill on a report from the right side, the reports on the left disappear. (190701056)

- ❑ When running an HTML report with multi-drill, the DRILLMENUITEM will not display if it contains an ampersand (&) in the description. XML requires some characters to be encoded, including the ampersand, which needs to be encoded for the Moonbeam. (190605087)

See all 8205 [fixes](#).

Upgrade Considerations for 8205.17

There were no new upgrade considerations included in this release.

See all 8205 [upgrade considerations](#).

System Requirements

- ❑ This release is now certified and has been tested with Google Chrome version 75 and Firefox Quantum 67.

See all detailed 8205 [system requirements](#), [third-party support](#), [accessibility compliance](#) and [more](#).
